QUIZZES

REFLECTION

WHAT DID YOU LEARN FROM THIS ACTIVITY?

THE ACTIVITY INVOLVES CREATING A WEB PORTFOLIO HOSTED ON GITHUB PAGES TO SHOWCASE QUIZZES, PROJECTS, AND OTHER WORKS. STUDENTS LEARN WEB DEVELOPMENT BASICS (HTML, CSS, JAVASCRIPT), USABILITY PRINCIPLES, AND VERSION CONTROL USING GITHUB. THE REFLECTION, "WHAT DID YOU LEARN FROM THIS ACTIVITY?" ENCOURAGES STUDENTS TO THINK ABOUT THE SKILLS GAINED, CHALLENGES FACED, AND HOW THE ACTIVITY ENHANCES THEIR PROFESSIONAL PRESENTATION AND TECHNICAL KNOWLEDGE.

Name of Evaluators: ULAM MILES / ANGELO BULLO
Course and Section: BSIT - 3A
Date: 3-18-25

Instructions:

- Use the checklist below to review a peer's project.
- Provide feedback for any areas needing improvement.

Category	Checklist Item	✓ / ✗ (Pass/Fail)	Notes for Improvement
Visual Appeal	Design is modern and visually appealing	✓	
	Text is readable and contrasts well	15	need improvement with colors
	Consistent fonts and colors are used		
Navigation	Navigation menu is clear and functional	✓	
	Links and buttons are easy to click	100	
Responsiveness	Page adapts well on desktop, tablet, and mobile	✓	
	No unnecessary horizontal scrolling on mobile	15	
Accessibility	Images have ALT text		
	Content is structured for easy readability	20	
Interactivity	Hover effects enhance user experience		
	Buttons and links function correctly	10	

Final Task:

- Based on the checklist results, write a short review (3-5 sentences) summarizing what works well and what can be improved.
- Suggest at least one specific enhancement for the design.

need consistent ideas on design for fonts
need improvement in font
be consistent

CAVITE STATE UNIVERSITY
 Slang Campus
 Brgy. 1, Slang, Cavite
 Department of Information Technology
MIDTERM EXAMINATION
 Second Semester B.Y. 2024-2025
ITEC 101 – HUMAN COMPUTER INTERACTION II
 SET A

UNIVERSITY MISSION
 Cavite State University shall provide
 students, employees, and citizens
 educational opportunities to the area
 science and technology research
 innovation and resource development
 and development activities and
 provide professional, technical, and
 community service for global
 competitiveness.

NAME: <u>VLAM MILES S</u>	DATE: <u>4-10-25</u>	SCORE: <u>21/30</u>	SECTION: <u>BSIT - 3A</u>
INSTRUCTOR: <u>JOHNEROS P. PUYO</u>			

General Directions: READ THE INSTRUCTIONS CAREFULLY. AVOID ERASURES AND ALTERATIONS OF THE FINAL ANSWERS. CHEATING IS NOT ALLOWED. WRONG SPELLING IS WRONG. USE OF A PENCIL IS NOT ACCEPTED.

MULTIPLE CHOICE: Read the question carefully and understand, and choose the right answer from the choices (1 point)

1. A company wants to design a website that adapts to different screen sizes. What HCI principle should they prioritize?

A. Visibility
B. Consistency
C. Responsiveness
D. Affordance
2. A user struggles to remember a 16-character password. Which usability principle can improve this experience?

A. Error prevention
B. Recognition over recall
C. Flexibility
D. Efficiency
3. A bank app requires customers to verify their identity with a fingerprint. This improves:

A. Cognitive load
B. Accessibility
C. Security and usability
D. Heuristic evaluation
4. A self-driving car's interface alerts the driver 10 seconds before taking control. This ensures:

A. User freedom
B. System transparency
C. Minimalism
D. Memorability
5. Which method is most effective for evaluating how users interact with a new prototype?

A. Heuristic evaluation
B. A/B testing
C. Card sorting
D. Affordance testing
6. A social media platform wants to reduce fake accounts while keeping the signup process simple. What approach is best?

A. Require lengthy verification processes
B. Implement a CAPTCHA test
7. A healthcare app provides voice-based navigation for visually impaired users. This feature enhances:

A. Learnability
B. Accessibility
C. Consistency
D. Minimalism
8. A productivity app provides users with keyboard shortcuts and drag-and-drop functionality. This follows the principle of:

A. Affordance
B. Flexibility & efficiency
C. Error prevention
D. Memorability
9. A smart home system allows users to set automated schedules for appliances. What principle does this represent?

A. User control & freedom
B. Feedback
C. Visibility
D. Efficiency
10. A food delivery app allows users to track the location of their order. This supports:

A. System feedback
B. Customization
C. Learnability
D. Memorability
11. A travel booking website displays available flight options with a progress bar showing seat availability. This improves:

A. Learnability
B. Visibility of system status
C. Accessibility
D. Minimalism
12. A new gaming console uses a UI similar to previous versions to help returning users adapt quickly. This demonstrates:

A. Consistency
B. Aesthetic appeal
C. Affordance
D. Error prevention
13. A customer service chatbot provides instant responses and suggests possible solutions before connecting to a human agent. This is an example of:

A. Cognitive overload
B. User control
C. Efficiency
D. Heuristic evaluation
14. A messaging app allows users to unsend a message within 10 seconds. This feature supports:

A. Memorability
B. Error recovery
C. Minimalism
D. Affordance
15. A news website uses infinite scrolling. This can negatively impact:

A. Accessibility
B. System feedback
C. Cognitive load
